CV — Afful Godfred

Afful Godfred — Software Engineer — Web Development & Automation

Software engineer crafting fast, modern websites — and the scrapers, bots, and AI pipelines that run them. Based in Nsawam, Ghana.

About

Results-driven software engineer with a B.Tech in Computer Science from Accra Technical University (Class of 2024). I build websites for people and businesses, then automate the repetitive parts — scrapers, bots, and AI pipelines.

I have created a lot of automations. Some are personal, some are for moments that matter, and some are still under construction.

Details

Education: B.Tech Computer Science — Accra Technical University, Class of 2024

Websites I've Built

- **Buuz** — Liquor e-commerce for Ghana — wine, gin, whiskey and cognac. Telegram sign-in, cedi pricing, and cash-on-delivery across Accra and beyond.
- **Nibies** — Product storefront with a full order flow — bulk purchases, delivery zones, and same-day dispatch in the major cities.
- **NuelJay** — Photography portfolio for a creative studio — fashion, products, weddings and outdoor work, built for a fast, striking experience.
- **Rene's Glow Luxe** — Beauty studio site for hair, nails and lashes in Taifa — services, hours, and a grand-opening offer.

Automations

- **3e3grams** — Robust Telegram automation toolkit for scraping, analyzing and managing Telegram dialogs — with Reddit trend detection and MongoDB persistence. Powered by the Telegram Client API and Playwright. *(JavaScript)*
- **sporty_bro** — Automated SportyBet odds scraper and analysis tool built on Playwright — an experiment that staked 110+ slips (9 games each) to prove betting is a waste of time and money. *(JavaScript)*
- **ancient_chat** — Cloudflare Workers-powered Telegram AI chat bot that delivers intelligent customer support with Google Gemini. Built for speed, deployed globally. *(JavaScript)*
- **tikYou** — CLI automation that downloads videos from TikTok and posts them to YouTube automatically. *(JavaScript)*
- **scraper_01** — Early web-scraping experiment — one of the first crawlers I ever wrote. The repository is private. · *Private*
- **fluffy-umbrella** — Ongoing crawl of publicly listed phone numbers across Ghana — several strategies attempted, still under construction. · *WIP*
